SKILLS

- **Languages:** Python, C, C++
- **Technologies:** YOLOv8, Computer Vision, Machine Learning
- **Databases/Tools:** PostgreSQL, Git, GitHub, Canva, Visual Studio Code, Google Colab, Platform IO, Antigravity
- **Soft Skills:** Problem solving, Team collaboration, Time management, Adaptability

PROJECTS

Speed Sense AI | [GitHub](#)

Mar 2026 - Aug 2026

- Developed an AI-powered speed governance system that detects road speed-limit signs using YOLOv8 and computer vision.
- Integrated ESP32, GPS, and motor-control hardware to translate detected speed limits into real-time vehicle speed control.
- Implemented a fallback mechanism using GPS-based speed-limit data for when traffic-sign detection is unavailable.
- Built an ESP32-based dashboard with an OLED display to show real-time speed-limit and system-status information.
- Tech Stack: Python, C++, YOLOv8, Computer Vision, Raspberry Pi, ESP32, GPS, Platform IO, L298N.

Burha Luit | [GitHub](#)

May 2026 - Aug 2026

- Built an AI-powered flood intelligence system to assess flood risk for individual locations and provide early warnings based on environmental and geographical conditions.
- Developed a machine learning pipeline analyzing rainfall, river levels, elevation, terrain, and historical flood patterns for location-specific flood-risk prediction.
- Designed an intelligent evacuation module to identify safer routes during flood events by combining real-time flood conditions with geographic and road-network data.
- Engineered a centralized platform for flood-risk visualization, enabling users to assess location vulnerability, monitor changing conditions, and make informed evacuation decisions.
- Tech Stack: Python, PyTorch, Scikit-learn, Pandas, NumPy, OpenCV, Machine Learning, Deep Learning, GIS/Geospatial Data, GPS, REST APIs.

CERTIFICATES

- Programming Fundamentals using Python - Part 1 | Infosys Jun 2026
- Programming Fundamentals using Python - Part 2 | Infosys Jul 2026
- C++ Programming Course - Self Paced | GeeksforGeeks Dec 2025

ACHIEVEMENTS

- Earned a Gold Badge on HackerRank for consistent, high-level programming practice.
- Achieved 5th runner-up at the IIT Guwahati Alcheringa Hackathon.

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; **CGPA: 9.29** Aug 2025 - Present
- **Kendriya Vidyalaya NFR Maligaon** Maligaon, Assam
Senior Secondary Education (12th); **Percentage: 85.7%** Jun 2023 - Mar 2024
- **Kendriya Vidyalaya NFR Maligaon** Maligaon, Assam
Secondary Education (10th); **Percentage: 92.2%** May 2021 - Mar 2022
